SUMMARY

Academic turned entry-level web developer with proficiency in both front-end and back-end development. Experience using Python framework and MySQL database. Work with strong multi-tasking and interpersonal skills cultivated throughout my freelance career. Commitment to offer clients responsive and customized websites and dynamic methods for content management. Also skilled in localizing technology documents in Chinese and capable of successfully executing bilingual websites. Seeking a career in web and software development that will allow me to progress and continue learning.

PROFESSIONAL EXPERIENCE

Freelance Web Developer   05/2020-current

- Currently customizing a CMS based website using WordPress for The Intentional Living Collective (NGO).
- Designed and developed a responsive website to query and display the client's personal comic collection using Python, Flask, HTML, CSS, and JS. Built logic to transform a pre-existing antiquated database into SQLite. Provided users with data import and export utilities. https://comiccollection.madeleinema.com/
- Created a 21 question-type animal guessing game using Python, Flask, HTML, CSS, and JS. Wrote logic with Python to query the SQLite database to guess the animal in the most effective manner. https://animalgame.madeleinema.com/
- Used Python, Flask, HTML, and CSS to design and build a translation sharing website with user login, searching, text editing, commenting, and tagging functionalities. http://jewelofchina.com/
- Developed my portfolio website using Flask, HTML, CSS, and JS. https://madeleinema.com/
